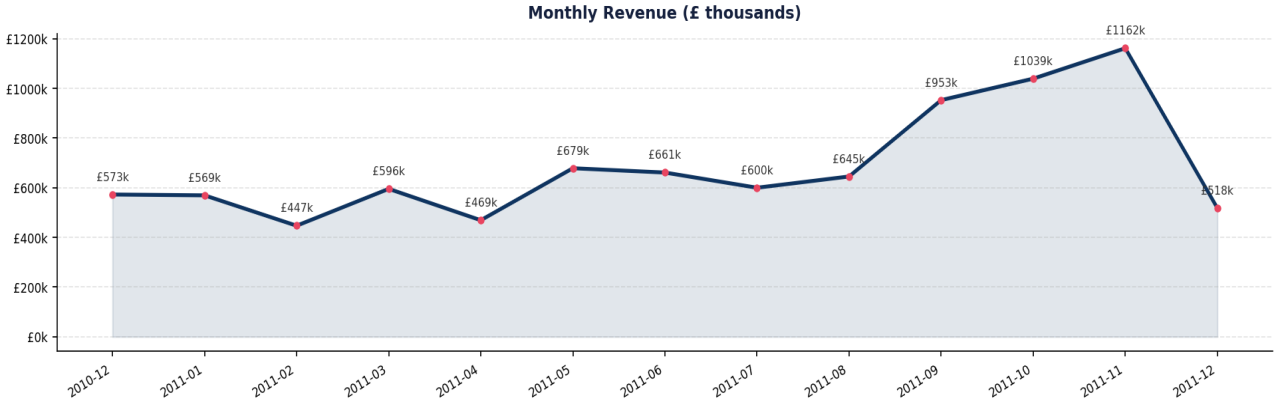
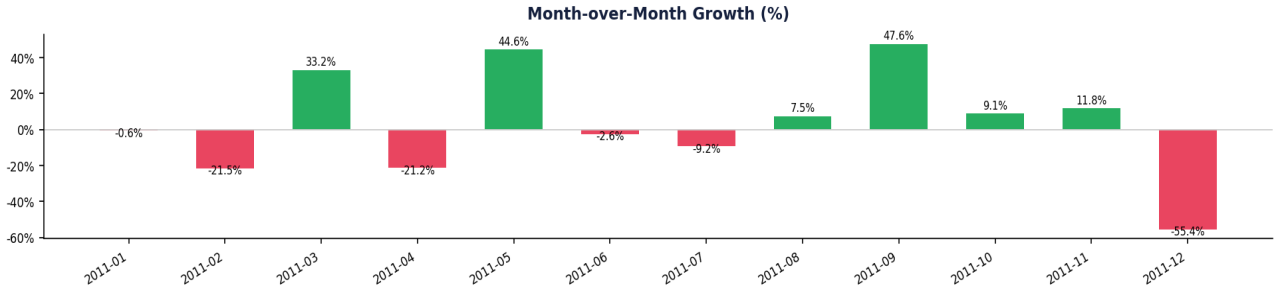
1. Monthly Revenue Trends





Monthly Breakdown

Month	Revenue	Units Sold	Orders	MoM Growth
2010-12	£572,714	312,265	1,400	—
2011-01	£569,445	349,098	987	-0.6%
2011-02	£447,137	265,622	997	-21.5%
2011-03	£595,501	348,503	1,321	+33.2%
2011-04	£469,200	292,222	1,149	-21.2%
2011-05	£678,595	373,601	1,555	+44.6%
2011-06	£661,214	363,699	1,393	-2.6%
2011-07	£600,091	369,420	1,331	-9.2%
2011-08	£645,344	398,121	1,280	+7.5%
2011-09	£952,838	544,897	1,755	+47.6%
2011-10	£1,039,319	593,900	1,929	+9.1%
2011-11	£1,161,817	669,051	2,657	+11.8%
2011-12	£518,193	287,413	778	-55.4%

Section Insights

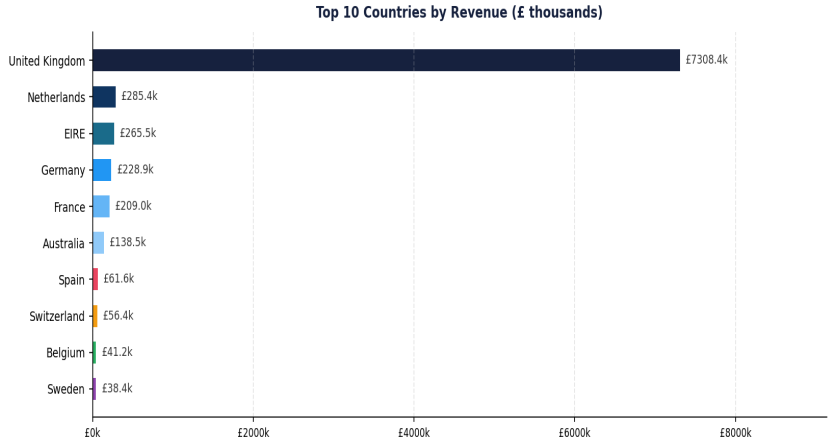
H2 2011 momentum: Revenue in Jul–Nov 2011 (£4.40M) was 29% higher than Jan–Jun 2011 (£3.42M), driven by a seasonal pre-Christmas surge. This confirms a strong back-half seasonality that should anchor the annual planning cycle.

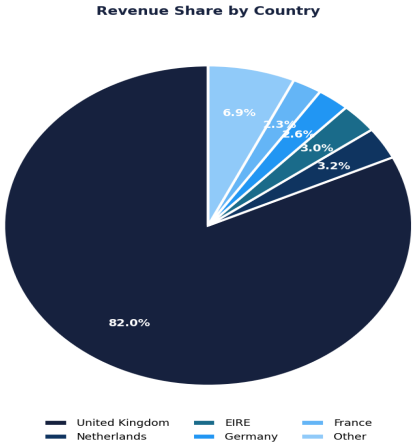
Dec 2011 caveat: The apparent –55.4% drop in Dec 2011 is misleading — the dataset covers only the first 9 days of December. Annualised, that month's run-rate is in line with Nov 2011.

Demand valleys to address: Feb and Apr 2011 were the weakest months (below average). These represent the best windows for promotional campaigns or new product launches to smooth revenue seasonality and maintain fulfilment team utilisation.

Growth acceleration: Revenue grew +47.6% MoM in Sep 2011 — the single largest positive jump. Understanding what drove this spike (a large B2B order, a marketing campaign, or seasonal demand) should be a priority to replicate the effect.

2. Geographic Analysis





Revenue by Country

Country	Revenue	% Total	Orders	Customers
United Kingdom	£7,308,392	82.0%	16,646	3,920
Netherlands	£285,446	3.2%	94	9

Section Insights

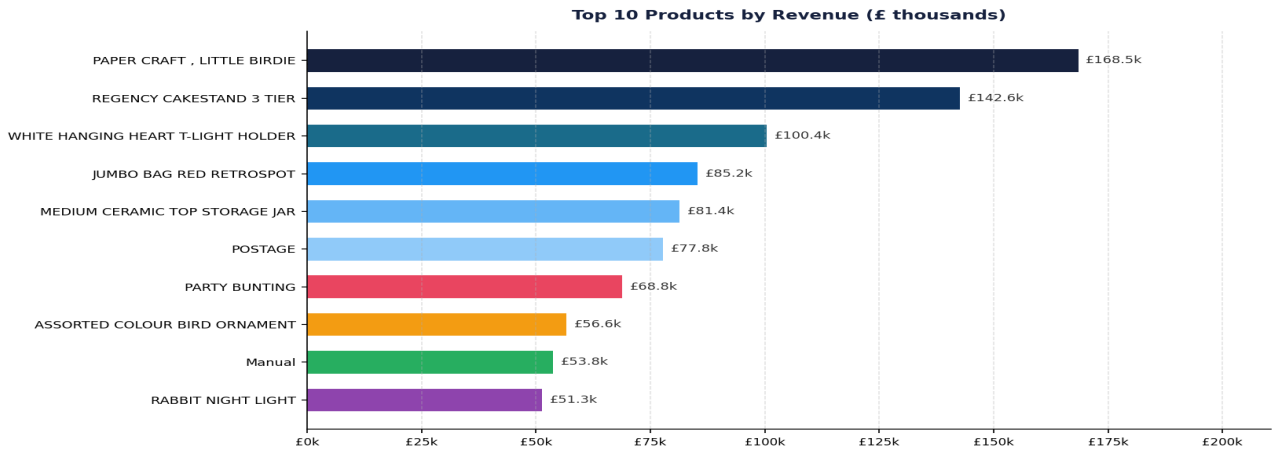
Concentration risk: The UK represents 82% of revenue from 90.3% of all customers. A single domestic market dependency of this magnitude is a strategic risk. Diversification into the top 5 international markets could add meaningful revenue with relatively low incremental cost.

High-value international accounts: Netherlands (9 customers, £31,716/customer avg) and EIRE (3 customers, £88,515/customer avg) dwarf the UK's £1,864/customer average. These are almost certainly wholesale or distributor accounts. Prioritise account management and volume incentives to protect and grow these relationships.

Germany & France — scalable retail markets: Germany (94 customers, £2,435/customer) and France (87 customers) show a much healthier customer count, suggesting a more diversified retail base. These markets have the best potential for structured DTC growth campaigns.

International upside: International markets already generate £1.60M (18.0% of total). Improving localised checkout (currency, language) and logistics in the top 5 international markets could realistically double that contribution within 2 years.

3. Product Performance



Top 20 Products by Revenue

#	Product	Revenue	Units Sold	Avg Price	% Total
1	PAPER CRAFT , LITTLE BIRDIE	£168,470	80,995	£2.08	1.89%
2	REGENCY CAKESTAND 3 TIER	£142,593	12,402	£12.48	1.60%
3	WHITE HANGING HEART T-LIGHT HOLDER	£100,448	36,725	£2.89	1.13%
4	JUMBO BAG RED RETROSPOT	£85,221	46,181	£2.02	0.96%
5	MEDIUM CERAMIC TOP STORAGE JAR	£81,417	77,916	£1.22	0.91%
6	POSTAGE	£77,804	3,120	£31.57	0.87%

19	SET OF 3 CAKE TINS PANTRY DESIGN	£33,348	7,020	£4.95	0.37%

20	JAM MAKING SET WITH JARS	£32,663	8,151	£4.18	0.37%

Section Insights

Long-tail revenue structure: The top 20 products account for only 14.2% of total revenue. This is a classic long-tail catalogue business — no single product dominates. This is resilient against product obsolescence but makes inventory forecasting more complex. Consider ABC analysis to prioritise stock depth for the top 50 SKUs.

Volume vs. value products: Most top-revenue products (e.g. PAPER CRAFT at £2.08, JUMBO BAG at £2.02) are high-volume, low-price items. Meanwhile, 'PICNIC BASKET WICKER 60 PIECES' (£650/unit, 61 units) and 'Manual' (£175/unit) are low-volume, high-ticket. Develop separate replenishment and margin strategies for each archetype.

REGENCY CAKESTAND — margin focus: At £12.48 avg price with 12,402 units sold (£142.6k), the Regency Cakestand combines decent volume with a mid-range price point. It likely has better margins than the bulk low-price items. Prioritise it in cross-sell and bundle strategies.

Product concentration opportunity: The #1 product (PAPER CRAFT , LITTLE BIRDIE) represents only 1.89% of revenue. There is headroom to build a 'hero SKU' strategy around 2–3 products with dedicated marketing investment to elevate their share to 5–8% each.

4. Customer Analysis

AVG CUSTOMER REVENUE	MEDIAN CUSTOMER REVENUE	REPEAT PURCHASE RATE	AVG ORDERS PER CUSTOMER
£2,054	**£674**	**65.6%**	**4.3**

Top 10 Customers by Revenue

#	Customer ID	Revenue	Orders	Avg Order Value	% Total
1	14646	£280,206	73	£3,838	3.14%
2	18102	£259,657	60	£4,328	2.91%
3	17450	£194,551	46	£4,229	2.18%
4	16446	£168,472	2	£84,236	1.89%
5	14911	£143,825	201	£716	1.61%
6	12415	£124,915	21	£5,948	1.40%
7	14156	£117,380	55	£2,134	1.32%

9	16029	£81,025	63	£1,286	0.91%
10	12346	£77,184	1	£77,184	0.87%

Section Insights

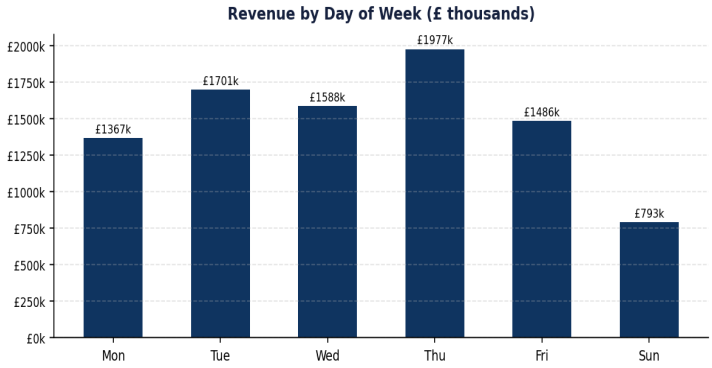
Revenue concentration — top customer risk: The top 10 customers generate 17.3% of total revenue. With an average/median ratio of 3.0×, a small number of whale accounts inflate the mean dramatically. Losing the top 3 customers would remove ~8% of revenue overnight. Assign dedicated account managers and create contractual lock-in (annual volume agreements, SLAs).

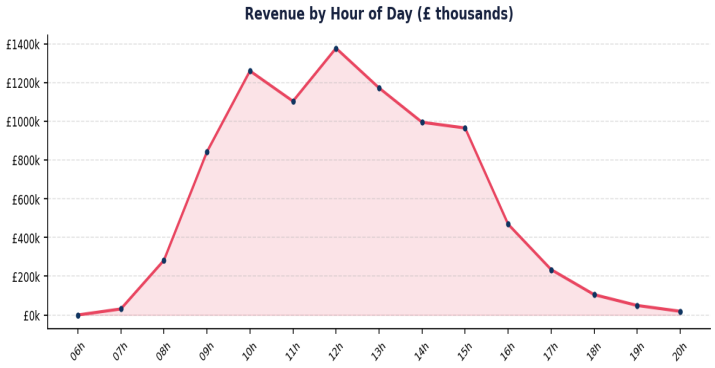
One-time buyer problem: 1,493 customers (34.4%) placed only a single order. Converting even 20% of these to repeat buyers would add roughly £201,401 in incremental revenue. A post-purchase nurture sequence with a time-limited discount is the highest-ROI intervention for this segment.

Repeat purchase rate is strong: 65.6% of customers made more than one purchase and average 4.3 orders each. This signals a genuinely loyal base — the business model works. The key lever is accelerating the path from first to second purchase, which cohort analysis confirms is the critical retention inflection point.

High-frequency vs. high-value segments: Customer 12748 placed 209 orders (roughly 16/month) at a low AOV — a classic distributor or reseller. Customer 16446 spent £168k in just 2 orders — a strategic bulk buyer. These require entirely different engagement strategies: frequency incentives for the former, relationship management for the latter.

5. Transaction Patterns





Revenue by Day of Week

Day	Revenue	% Total	Orders
Monday	£1,367,146	15.3%	2,863
Tuesday	£1,700,635	19.1%	3,184
Wednesday	£1,588,336	17.8%	3,455
Thursday	£1,976,859	22.2%	4,032
Friday	£1,485,917	16.7%	2,829
Sunday	£792,514	8.9%	2,169

Section Insights

B2B operating pattern confirmed: Saturday appears to have no transactions and Sunday accounts for only 8.9% of revenue. The business operates almost exclusively Mon–Fri (91% of revenue), consistent with a wholesale or trade-buyer customer base rather than a consumer retail model. Marketing and customer service resources should be concentrated on business days.

Thursday is the power day: Thursday alone drives 22.2% of weekly revenue (£1.98M). This is likely tied to order-cycle timing — buyers finalise weekly orders mid-week for end-of-week dispatch. Ensure peak stock availability and fulfilment capacity on Wednesdays and Thursdays to avoid lost orders.

Peak hour window (around 12:00): Revenue concentrates between 12:00–11:00, the classic B2B mid-morning ordering window. Schedule email campaigns, promotions and customer outreach to land in inboxes before 10:00 to capture intent at its highest point.

Operational planning: The concentration of orders in a 4-hour mid-day window (Mon–Thu) means that warehouse picking, packing and carrier cut-off times should all be optimised around this pattern. Off-peak hours (early morning, Friday afternoon) are ideal for inventory replenishment, system maintenance and staff training.
